EDUCATION

INDIAN INSTITUTE OF TECHNOLOGY ROORKEE | B.TECH CIVIL ENGINEERING Roorkee, India | July 2017 - May 2021

EXPERIENCE

SIGNOZ INC | SOFTWARE ENGINEER

Remote | Mar 2025 – Present

- Architected a two-tier JSON storage system on ClickHouse for native in-depth JSON log queries, handling ~100M logs/minute in SigNoz Cloud production.
- Automated forwarding of AWS-generated S3 log files into SigNoz by building the S3 Sync feature.
- Owned the Logs Pipelines feature end to end, improving JSON parsing and integrating the OpAMP protocol with the SigNoz OTel Collector
- Expanded SigNoz's AWS integration suite by onboarding 5 new services - ECS, DynamoDB, SNS, ElastiCache, and SQS.

DATAZIP INC | LEAD BACKEND ENGINEER

Bengaluru, India | Aug 2022 – Nov 2024

- Designed and delivered a full data-engineering stack end to end - ingestion, warehouse, transformation, and BI - as the founding backend engineer.
- Cut full-load ingestion time 12X and CDC 2X by designing Gear5, a Go-based data replication system that later became the foundation of olake.io
- Cut warehouse scale-up/down from 5–8 min to <90s via OpenEngine - storage/compute separation on AWS Fargate / Azure Container Apps with live query rerouting to freshly provisioned ClickHouse instances.
- Enabled analysts to author models, track data lineage, and schedule transformation jobs by building a transformation layer on top of dbt-core (OSS).
- Automated cluster lifecycle management with CL-Master, an operator handling node up/down-scaling, rolling image updates, system recovery, warehouse EBS autoscaling, and license management.

HDFC LIFE | SOFTWARE ENGINEER — PLATFORM TEAM

Mumbai, India | July 2021 – Aug 2022

- Built wrapper APIs for OCR-based document processing and a bulk URL-shortening tool (Excel-driven) for internal platform use.

CLOUD NATIVE COMPUTING FOUNDATION | GSoC '21 - MESHERY CLI MAINTAINER Remote | June 2021 – Aug 2021

- Shipped CLI commands for mesheryctl to manage filters, patterns, and performance profiles/results, including the ability to run performance tests directly from the CLI.
- Raised mesheryctl test coverage by 33% by introducing Go unit testing for its Cobra commands.
- Built a pre/post-deployment health-check system to validate Meshery's environment state.
- Refactored and consolidated ~65 server endpoint handlers and authored OpenAPI documentation covering ~70 handlers for Meshery's REST API.

SKILLS

PROGRAMMING LANGUAGES
TECHNOLOGIES
DATABASES

Golang, Python
Kubernetes, OpenTelemetry, OpAMP, AWS/Azure, GitHub CI
ClickHouse, PostgreSQL, Redis
